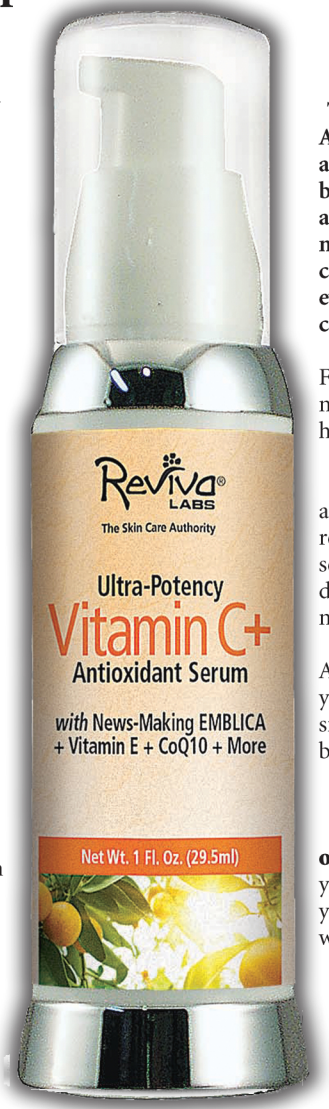
NOW! Powerful New Antioxidant Protection Against Skin-Aging Free Radicals!

(A product like no other)

As you know, Free Radicals are the major cause of skin aging. Antioxidants are vital to render them harmless. Traditional antioxidants like vitamin C, E and COQ10 neutralize "oxygen free radicals."

But recently skin science has discovered that Pollution-- from auto exhausts, soot & polluted air produce a different type of harmful free radical, "nitrogen free radicals."

As far as we know, Reviva Labs is the first to neutralize nitrogen free radicals with new VITAMIN C+ ANTIOXIDANT SERUM. Not only does the new serum offer a higher potency vitamin C plus supporting antioxidants that negate sun's oxygen free radicals, Reviva Labs discovered that **EMBLICA**, from the Indian Gooseberry plant, and other plant extracts have unique power to scavenge pollution's nitrogen free radicals. **Reviva's formula neutralizes both!**



1oz. airless pump bottle $32.00

Thus Reviva's new Antioxidant Serum offers a dramatic new level of broad spectrum protection against the oxygen/ nitrogen free radicals that cause wrinkles, loose skin, even skin cancer.

Free radicals that do so much damage to skin health and appearance.

For ultimate defense against future damage, we recommend you use the serum under your current day cream or under makeup each morning.

And don't be surprised if you see your skin feeling smoother and looking better.

It's a product like none other! An addition to your skin care regimen you won't want to part with.
